

## 1-2-3 TREAT: BOX CONSTRUCTION INSTRUCTIONS

*If you have any questions as you complete the tasks, please refer to the Cognitive Assessments section of our FAQs page located at [dogagingproject.zendesk.com](https://dogagingproject.zendesk.com).*

**To make the boxes from scratch, follow the instructions below. If you want to use the template on the next page, please print and follow those guidelines.**

1. Make a square in the center of the cardboard that measures 4 inches by 4 inches.
2. Draw 4 additional rectangles that measure 4 inches by 2.5 inches with each one extending from one edge of the center square, creating a cross shape.
3. Cut along the outer edges of the cross shape. Make sure you only cut along the outer edges and do not cut along the edges of the center square.
4. To assemble the box, fold each of the outer rectangles upward to form the sides of the box. The center square is now the bottom of the box.
5. Wrap tape around all four sides of the box to secure them together.
6. Repeat these instructions to create two more identical boxes.
7. Using the Sharpie marker, label the boxes you have created with the numbers 1, 2, and 3. Make sure that the numbers on the boxes are large enough that they can be read from a distance of about six feet.
