

This section of the Annual Follow-Up collects demographic information about you and your household. Some of these questions may seem quite personal and more relevant to a human study than a dog study. However, the Dog Aging Project is a comprehensive investigation of dog health. That means we want to study ALL dogs from ALL kinds of homes.

We use the demographic information collected here to monitor ourselves, not you! We separate your personal identification (name, email, etc.) from the information about age or income, then we look at the anonymous information to make sure that we have people from all walks of life in the study.

Equity is a core value of the Dog Aging Project. We are a scientific project, first and foremost, but we are also a community. We believe that both our science and our community are stronger when we include everyone.

All questions are required unless stated otherwise. Please answer to the best of your ability.
